Professional Summary

I'm Vedant Shahare, an indie game developer currently working on a horror RPG and learning to build game engines. My skills include Unreal Engine, C++, Blender, Krita, and Premake(C++ build system), with experience in creating automated scripts using Python. I'm also developing my own 3D game engine in C++ and honing my concept art skills in Krita. I'm excited to collaborate on innovative game development and artistic projects.

Skills & abilities

- Unreal Engine
- Blueprint
- GitHub
- Krita
- C++
- Premake
- Creative Writing
- Digital Painting
- Blender
- Python
- OpenGL

Present Projects

- **Constellation Engine:** 3D game engine written in C++, supports OpenGL as graphics renderer. Visit [Constellation Engine Blogs](#).
- **In a Corner of the World:** In a remote village, far from the bustling cities, something sinister lurks, unnoticed by the outside world. In a Corner of the World is a small indie horror RPG that tells the story of this forgotten village, where strange events began unfolding a few weeks ago. Visit [In a Corner of the World Blogs](#).

Past Projects

- **CStellSFML:** A 2D game engine using C++ and SFML.
- **SkillCompletionPipeline:** College project under theme “innovative idea” using Godot, YouTube Restful API, and Google Firebase.
- **SpreadSheet Updater:** Updates Google Sheets with the help of Google Form using python.
